DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: claims 175,180-188, 193,198 and 200. The species are independent or distinct because the substitutions and nature of the on rigid linker group and Ar' group are different which are capable of labeling aggregated paired helical filament (PHF) tau protein.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species/ligand explicitly for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. The single disclosed species/ligand must specifically identify a specific chemical moieties, for all the components present in the claimed invention, i.e. a single compound. Currently, claim 175 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
